Summary

I am a Full Stack developer in several programming languages (C#, PHP, Java) and different frontend frameworks (Angular, Angular.js, React.js, Vue.js), I have experience making webapps using good practices in many projects. Act as technical leader in development projects in the risk area. I have knowledge in relational databases (SQL Server, Postgres, Mysql, Sqlite) and NoSQL (MongoDB).

I have a proactive mentality and I consider myself self-taught, I love teamwork, I work with agile methodologies (scrum, kanban). I use code version control tools (Git, Github, Bitbucket).

Experience

2014 • Developer | Full Stack Developer
2017 | Conceso Ltda.

`MySQL` `PostgreSQL` `SQLite` `Vue.js` `PHP` `HTML/CSS` `JavaScript`

Tools: ZKtecko for manage biometric system, apache server with XAMPP, Visual Studio Code, MySQL Server, Sublime Text 3, Google Chrome Developer and Epson SDK
Frameworks: Bootstrap, JQuery.
Third-party:
Version Control:
Project Management:
Project:
Description: I was the technical reference for the project working in feature implementation, customizations and enhancements for 2 products on the company.
Backend development using PHP to manage Mysql Database.
Frontend development with forms in HTML, JavaScript, Bootstrap, jQuery and CSS.
Extensive database work in table creation, stored procedures, functions, triggers, views.

2018 • Developer | Backend Developer
2021 | AyA Ingenieros y Consultores

`MySQL` `PostgreSQL` `SQLite` `Bitbucket` `Trello` `HTML/CSS` `Java`

Tools: ZKtecko for manage biometric system, apache server with XAMPP, Visual Studio Code, MySQL Server, Sublime Text 3, Google Chrome Developer
Frameworks: SpringBoot
Version Control: Bitbucket

Project: Emavias(Human Resources), MTEPS (Human Resources)
Description: Developer of web applications in JAVA with Spring as framework I develop webapps with Rest Controller Rest API in the backend in database I work in table creation, stored procedures, functions, triggers and views. I managed in a Linux environment, using opersource technologies, making reports with the JasperReports server and itext for pdf and excel reports file.

2021 • Intern
2021   Fundacion Jala

| SQL | C# | Git | HTML/CSS | JavaScript | Azure Devops | React.js | .NET Core |
| MongoDB |

Tools: Azure Portal, Visual Studio Code, Visual Studio 2019, SQL Server, SQL Management Studio, Azure Data Studio, Mongo Compass, Google Chrome
Frameworks: React.Js
Third-party: Emsi Skills.
Version Control: GitHub
Project Management: Azure Devops
Project: TeamUp
Description: I was in a team of 12 people using SCRUM as a framework, and agile principles, my main role was as a developer, I worked mainly in the backend area, and took frontend tasks at the beginning of the project. Additionally, deploy the SQL Server database in Azure, I could create scripts Creation and insertion of data, help with the creation of stored procedures. Actively participate in product presentation and planning tasks

2021 • Developer | Backend Developer
2021   Jalasoft

| C# | Azure Devops | Back-end Testing |

Tools: Azure Portal, Visual Studio Code, Visual Studio 2019, SQL Server, SQL Management Studio, Azure Data Studio
Third-party: X-Ray for load Testing
Version Control: Github
Project Management: Azure Devops
Project: Win Team Scripting (Load Testing)
Description: Load testing, generating scripts for automated testing of user interfaces, load times, use of resources and annexes with c#.

2021 • Developer | Backend Developer
2022   Jalasoft

| PHP | Laravel | GitLab | GitHub | Git | MySQL | Jira |

Tools: Gitlab, Visual Studio Code, Xampp, Mysql Workbreanch
Frameworks: Laravel
Version Control: Gitlab
Project Management: Gitlab
Project: Recruit Me

Description: I was a back-end developer creating Rest API endpoints, using Laravel as a framework, documenting, and having test scenarios with integration and unit tests. From my role I was able to create the http methods to access the different system operations, I was able to create scripts for the database logic and the migration to the Laravel ORM. I was able to feed the database with Laravel's seeder and database migration scripts.

2022
Present • Developer | Full Stack Developer

Jalasoft

`PostgreSQL` `Git` `Angular.js` `Jira` `Back-end Testing` `Java`
`Microsoft SQL Server` `MySQL`

Tools: Azure Portal, Visual Studio Code, Visual Studio 2019, SQL Server, SQL Management Studio, Azure Data Studio, Postgres
Frameworks: Spring-boot
Third-party: N8N automation tools
Version Control: Github
Project Management: Jira
Project: CRM base integration.
Description: In this project, I helped implement integrations with different services like Microsoft Graph, Office 365, and Google Oauth. During this project, I was responsible for configuring the CRM software, developing integrations with existing systems, mapping customer data, with a large volume.

Education

2011
2012 • Programing

Instituto Tecnico Jesus Maria

Middle Technician in Computer Programming.

2011
2013 • Systems Analytics

Instituto Tecnico Jesus Maria

Higher Technician in Systems Analysis (Technical Institute, public endorsed by
the Ministry of Education)

2017
2018 • Diploma in Higher Education

UNIBOL

Diploma in Higher Education October 27, 2017 to May 12, 2018 issued by
UNIBOL (In process).

2020
Present • Bachelor's degree in Systems Engineering

UNIVERSIDAD ADVENTISTA DE BOLIVIA
